

**BOARD OF STUDIES IN B.Sc HORTICULTURE
2022-2023**

DEPARTMENT OF HORTICULTURE

SYLLABUS FOR B. Sc HORTICULTURE

PITHAPUR RAJAHS GOVERNMENT COLLEGE

Autonomous and Accredited with 'A' Grade by NAAC (3.17 CGPA)

KAKINADA – 533 001, E G Dist., ANDHRA PRADESH

P R GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA, E.G.Dist.

Department of Horticulture

The Board of Studies meeting for Horticulture subject during the academic year 2022-2023 is conducted at the Dept. of Botany & Horticulture on Dec-2022 with Capt.Dr.M.Krishna Rao, Lecturer in-Charge in the chair along with the following members.

Name, Designation and Address

Signature

1. CHAIR PERSON:

Capt.Dr.M.Krishna Rao
Lecturer in-Charge
Dept. of Horticulture
PRGC(A), Kakinada

2. ADIKAVI NANNAYA UNIVERSITY NOMINEE:

Dr. J.SUNITHA,
Principal
GDC Kovvur
Mobile: 9441050910
E-mail: drjsuneetha@gcrjy.ac.in

3. MEMBERS NOMINATED BY EXECUTIVE COUNCIL OF THE COLLEGE:

4.

a. SUBJECT EXPERT 1:

Dr.A.Srinivasa Rao
Lecture in Botany
Arts College, Rajahmundry,
Mobile;9985076306
E-Mail;drannabattulasrao@gmail.com

b. SUBJECT EXPERT 2

Dr. K.V.V.G.K.VARA PRASAD
Lecturer in Botany
GDC(A), Tuni
Mobile: 9908876727
E-mail: prasadkommula03@gmail.com

c. SUBJECT EXPERT 3:

Dr.M.Sulakshana
Lecturer in Botany
ASD Women's Degree College Kakinada
Mobile:7997633870

d. INDUSTRIAL EXPERT :

Smt P.SWATHI
Assistant Director,
Biological Control Laboratory
Dept. of Agriculture, Kakinada
Mobile: 9848350962
E-Mail: swathi3002@yahoo.com

Swathi

Name, Designation and Address

Signature

**e. ALUMNI MEMBER:
Dr. D R SALOMI SUNEETHA**

Professor & Head
Plant Physiology, Biochemistry & Microbiology Dept.
Dr YSR Horticultural University
Venkatramannagudem-534101 W G Dist
Mobile: 9491608088
Email: salomibiochem@gmail.com

Suneetha

**5. MEMBERS FROM THE COLLEGE:
FACULTY MEMBER:**

1. B.Ashok Rama Raju
Guest Faculty in Horticulture

B.Ashok Rama Raju

2. P.Rajesh
Guest Faculty in Horticulture

P. Rajesh

b. STUDENT MEMBERS:

3. I.S.S.N VINEETHA

II HBC

I. S. S. N. Vineetha.

4. P.RAJESWARI

II B.VOC

S. Rajeswari

**PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
DEPARTMENT OF BOTANY & HORTICULTURE**

Student will know about selection of nursery, raising of nursery beds, structures for planting and its problems and management

PROGRAMME OUTCOMES FOR HORTICULTURE(PO)

B.Sc. Horticulture programmes aim towards:

- Imparting detailed knowledge of Horticulture and its allied branches
- Facilitating detailed study of allied branches required to raise the income of farmers
- Providing detailed knowledge of horticulture in India and Indian farmers income generating enterprises
- Knowledge dissemination regarding various technique of farming and farming system in India
- Detailed knowledge of cultivation practices, climate, Soil, fertilizers
- Study of market and marketing of horticulture produce.
- Specific knowledge of various branches specialized to their studies.
- Detailed knowledge on the subject to improve the farmer's condition by their contributions.

PROGRAMME SPECIFIC OUTCOMES (PSO):

- Considers the acquisition, integration, and application of plant-science knowledge expected for horticulturists. This knowledge is often taught in formal classes and through books.
- The capacity to integrate knowledge across a range of disciplines (e.g., business, soils, pathology), and have the ability to actually perform physical tasks that require practice and training (e.g., grafting).
- To develop creative skills to solve problems and improve current systems.
- Sets an expectation that graduates will be able to communicate about more than just the science behind horticulture, but also about the social, spiritual, and cultural importance of plants.
- Finally, horticulture graduates ought to have developed leadership skills, learned how to work in teams, and exhibit a high level of professionalism and personal responsibility.

COURSE OUTCOMES:

SEMESTER – I: BASIC CONCEPTS OF HORTICULTURE AND SOIL SCIENCE

UNIT I: INTRODUCTION TO HORTICULTURE

Objective

To study Horticulture definition, divisions and zones with examples, importance and its scope,

Learning outcome

Student will know about horticulture introduction, its branches, importance and future aspects in all the terms including employment generation, environmental protection and human resource development.

UNIT II: CLASSIFICATION AND NUTRITIONAL VALUES OF HORTICULTURE CROPS

Objective

To study the classification, nutritional value

Learning outcome

Student will know about classification based on soil and climatic requirements, its nutritional importance and export, import value

UNIT III: ENVIRONMENTAL FACTORS - HORTICULTURE CROPS

Objective

To acquaint Soil properties, climatic factors and biotic and abiotic stresses on crop production.

Learning outcome

Student will know about soil physical and chemical properties Climatic factors, micro climate, pollution and influence of biotic and abiotic stresses on crop production

UNIT IV: SOIL AS A MEDIUM FOR PLANT GROWTH

Objective

To acquaint Soil formation, soil taxonomy, colloids as a Medium for Plant Growth

Learning outcome

Student will know about Minerals and Weathering to form Soils, Soil color, texture and structure; Other Physical Properties and Stability. Soil colloids and charges

UNIT V: MINERAL NUTRITION OF PLANTS

Objective

To study Soil organic matter as a source of nutrient management

Learning outcome

Student will know about Soil organic matter, microorganisms; Soil faunal ecology and Integrated nutrient management

COURSE SPECIFIC OUTCOMES

Students will understand Horticulture importance, scope, nutritional values, soil factors, environmental factors and mineral nutrition all these which is helpful for plant growth and also income generation to farmers

SEMESTER – II: PLANT PROPAGATION METHODS AND NURSERY MANAGEMENT

UNIT -1: BASICS OF PROPAGATION; STRUCTURES AND MEDIA FOR PROPAGATION

Objectives

To study the Principles and classification of plant propagation methods

Learning outcome

Student will know about plant propagation methods, economic and ecological factors

UNIT – 2: SEXUAL PROPAGATION/SEED PROPAGATION

Objectives

To study the Sexual propagation, Seed germination and its factors

Learning outcome

Student will know about propagation methods, seed germination, factors and treatments required for germination

UNIT – 3: PROPAGATION THROUGH VEGETATIVE ORGANS

Objectives

To acquaint the Asexual propagation, Plant propagation structures, containers and media **Learning**

outcome

Student will know about propagation methods and its application, required media for its growth and cultivation

UNIT – 4: VEGETATIVE PROPAGATION TECHNIQUES

Objectives

To acquaint the Propagation techniques by cuttings, layering, grafting, budding

Learning outcome

Student will know about different techniques and its application to the fruits and flowering plants

UNIT –5: NURSERY MANAGEMENT PRACTICES

Objectives

To study the Nursery, Nursery structures, Problems and its control

Learning outcome

COURSE SPECIFIC OUTCOMES

Students will understand selection of nursery, different propagation techniques and its application to fruits and flowers finally its management

SEMESTER-III: OLERICULTURE

UNIT -1: SOLANACEOUS VEGETABLES

Objectives

To study the cultivation details of Solanaceous vegetables

Learning outcome

Student will know about Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of tomato, bendhi,brinjal, chilli

Bulb Crops- Protected Cultivation Onion

UNIT – 2: LEAFY VEGETABLES

Objectives

To acquaint cultivation details of leafy vegetables

Learning outcome

Student will know about Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of amaranthus, spinach, coriander, methi

UNIT – 3: ROOT AND TUBER CROPS

Objectives

To acquaint cultivation details of root and tuber crops

Learning outcome

Student will know about Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of Colocasia and Dioscorea, Sweet Potato and Tapioca, Carrot and Beet root

UNIT – 4: COLE CROPS

Objectives

To study the cultivation practices of cabbage and cauliflower

Learning outcome

Student will know about Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of cabbage and cauliflower

UNIT –5: LEGUMINOUS VEGETABLES

Objectives

To acquaint cultivation practices of leguminous vegetables

Learning outcome

Student will know about Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of cluster bean, double bean, cow pea and Dolichos

COURSE SPECIFIC OUTCOMES

Students will understand Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of solanaceous, leafy vegetables, cole crops and leguminous vegetables

SEMESTER-IV: ORNAMENTAL HORTICULTURE, FLORICULTURE AND LANDSCAPING

UNIT -1: LEAFY AND FLOWER ORNAMENTALS

Objectives

To study the classification and value chain of ornamentals

Learning outcome

Student will know about application of leafy and flower ornamentals also its value in India and abroad

UNIT – 2: FUNDAMENTALS OF LANDSCAPING

Objectives

To study the principles of landscaping, features and styles of gardening

Learning outcome

Student will know about importance and scope of landscaping, Indoor and outdoor gardens; garden features, garden adornments

UNIT – 3: CULTIVATION OF ORNAMENTALS**Objectives**

To acquaint Importance, description, cultivation of ornamentals

Learning outcome

Student will know about the use of annuals; biennials, herbaceous perennials, woody perennials and identification of ornamental trees, shrubs and climbers used for various purposes. Skills on flower shows and flower arrangements.

UNIT – 4: COMMERCIAL FLORICULTURE**Objectives**

To acquaint importance and cultivation details of flower crops

Learning outcome

Student will know about importance of commercial floriculture in India also cultivation practices of Rose, Jasmine, Chrysanthemum and Marigold, Tuberose, Aster, Dahlia, Gerbera, Gladiolus

UNIT –5: MANAGEMENT PRACTICES FOR ORNAMENTAL PLANTS**Objectives**

To study the horticultural practices, handling methods and storage techniques

Learning outcome

Student will know about use of Plant Growth Regulators, plant protection methods, special horticultural practices also harvesting and post-harvest handling methods required for proper grading, packing, storage and marketing of ornamental flowers.

COURSE SPECIFIC OUTCOMES

Students will understand importance of ornamental plants and its principles, features for gardening. Skills on flower arrangement techniques also different flowers cultivation details finally its protection and proper management techniques.

SEMESTER-V CONCEPTS OF POMOLOGY**UNIT -1: INTRODUCTION TO FRUIT CROPS****Objectives**

To study the importance and nutritive value of fruit crops.

Learning outcome

Student will know about area and production of fruit crops in India and Andhra Pradesh.

UNIT-2: TROPICAL FRUITS**Objectives**

To study the cultivation practices followed in Mango, guava, and papaya.

Learning outcome

Student will know about the soil, climate, varieties, land preparation, spacing, layout, planting, intercultural operations, fertilizer application, irrigation, pest and diseases, harvesting of Mango, Guava, and papaya.

UNIT-3: SUB TROPICAL AND TEMPERATE FRUITS

Objectives

To study the cultivation practices of Grapes, pomegranate and Apple.

Learning outcome

Student will know about the soil, climate, varieties, land preparation, spacing, layout, planting, intercultural operations, fertilizer application, irrigation, pest and diseases, harvesting of Grapes, Pomegranate, and apple.

UNIT-4: ARID AND MINOR FRUIT CROPS

Objectives

To study the cultivation practices of Amla, Ber, Bael and Wood apple.

Learning outcome

Student will know about the soil, climate, varieties, land preparation, spacing, layout, planting, intercultural operations, fertilizer application, irrigation, pest and diseases, harvesting of Amla, Ber, Bael and Wood apple.

UNIT-5: MANAGEMENT PRACTICES FOR FRUIT CROPS

Objectives

To study the integrated orchard management.

Learning outcome

Student will know about the production practices and storage and transport of local fruits.

SEMESTER -V: DISEASES OF HORTICULTURE PLANTS AND THEIR MANAGEMENT

UNIT -1: DISEASES OF VEGETABLE CROPS

Objectives

To study the diseases in vegetable crops.

Learning outcome

Student will know about various diseases in vegetable crops like Brinjal, tomato and chilly.

UNIT – 2: DISEASES OF ORNAMENTAL CROPS

Objectives

To study the diseases in Ornamental crops.

Learning outcome

Student will know about various diseases in ornamental crops like Rose, chrysanthemum, jasmine, marigold, tuberose and gladiolus.

UNIT-3: DISEASES OF FRUIT CROPS

Objectives

To study the diseases in fruit crops

Learning outcome

Student will know about various diseases in fruit crops like Mango, grape, papaya and citrus.

UNIT-4: INTEGRATED PEST AND DISEASE MANAGEMENT

Objectives

To study the integrated management of pest and diseases.

Learning outcome

Student will know about chemical nature, use, methods of application, toxicity, maximum residue level in pesticide and pesticide management.

UNIT-5: PESTICIDES

Objectives

To study the integrated pest and diseases management in fruits, vegetables, flower, medicinal and plantation crops.

Learning outcome

Student will know about insect pests and nematode pests in horticultural crops and their management.

SEMESTER-VI: PROTECTED CULTIVATION OF HORTICULTURAL CROPS**UNIT -1: PROTECTED STRUCTURES****Objectives**

To study the scope and information of growing vegetable crops in protected structures

Learning outcome

Student will know about regulation of climatic factors like temperature, relative humidity, CO₂ and light in protected structures.

UNIT – 2: AGRICULTURE FINANCE AND MANAGEMENT**Objectives**

To study the loans and credit related to Agriculture.

Learning outcome

Student will know about sources of Agriculture finance and principles of farm credit.

UNIT-3: NURSERY PRODUCTION**Objectives**

To study the nursery raising in protected structures.

Learning outcome

Student will know about types of benches and containers and different media for growing nursery.

UNIT-4: CULTIVATION OF HORTICULTURAL CROPS IN PROTECTED WAYS**Objectives**

To study the intercultural operations to promote yield in protected structures

Learning outcome

Student will know about training and staking vegetable crops, regulation of flowering and fruiting in horticultural crops.

UNIT-5: CROP PROTECTION**Objectives**

To study the recognition and management of disorders, diseases, pests and weeds.

Learning outcome

Student will know about use, handling, transport storage of plant protection chemicals.

SEMESTER-VI: HORTICULTURE EXTENSION AND VALUE ADDED PRODUCTS**UNIT -1: BASICS OF HORTICULTURE EXTENSION****Objectives**

To study the scope and principles of extension education.

Learning outcome

Student will know about transfer of technology programme. Scope and importance of participatory rural appraisal and rapid rural appraisal.

UNIT – 2: COMMUNICATION AND PROGRAMME PLANNING**Objectives**

To study the communication and barriers in communication.

Learning outcome

Student will know about programme planning and evaluation of extension programmes.

UNIT-3: MODERN COMMUNICATION GADGETS**Objectives**

To study the modern communication sources.

Learning outcome

Student will know about internet, videos and tele conferencing, kisan call centre and mobile phone.

UNIT-4: PROCESSING AND VALUE ADDITION**Objectives**

To study the preservation of fruits and vegetables by using sugar, salt, dehydration process and canning.

Learning outcome

Student will know about the preparation of jams, jellies, marmalade, squash, RTS, nectar, fruit bars, preserves and candies, pickles and sauces.

UNIT-5: PRINCIPLES OF PRESERVATION**Objectives**

To study the preservation of fruits and vegetables by low temperature

Learning outcome

Student will know about preservation by irradiation and freezing

SEMESTER-VI: MEDICINAL PLANTS AND PLANTATION CROPS**UNIT -1: PLANTATION CROPS-1****Objectives**

To study the cultivation practices of coconut, oil palm and cocoa.

Learning outcome

Student will know about soil, climate, varieties, land preparation, spacing, planting, intercrops, intercultural operations, fertilizer application, irrigation, pest and diseases and harvesting of Coconut, oil palm and cocoa crops.

UNIT – 2: PLANTATION CROPS-2**Objectives**

To study the cultivation practices of Cashewnut and Coffee.

Learning outcome

Student will know about soil, climate, varieties, land preparation, spacing, planting, intercrops, intercultural operations, fertilizer application, irrigation, pest and disease and harvesting of cashewnut and coffee.

UNIT-3: MEDICINAL CROPS-1**Objectives**

To study the cultivation practices of Aloe, Ravolfia, morinda and citronella.

Learning objectives

Student will know about soil, climate, land preparation, spacing, planting, intercultural operations, fertilizer application, irrigation, pest and disease and harvesting of Aloe, Ravolfia, morinda and citronella

UNIT-4: MEDICINAL CROPS-2**Objectives**

To study the cultivation practices of Citronella, lemongrass and Mint.

Learning objectives

Student will know about soil, climate, land preparation, spacing, planting, intercultural operations, fertilizer application, irrigation, pest and disease and harvesting of Citronella, lemon grass, and Mint.

HORTICULTURE Model Blue Print for the Question paper and choice for I & II Years (w.e.f. 2019-20 Academic Year)

S.No	Type of Questions	To be given in the Question paper			To be Answered		
		No. of Questions	Marks Allotted to each Questions	Total marks	No. of Questions	Marks Allotted to each Questions	Total marks
1	<u>SECTION-A</u> ESSAY QUESTIONS (EQ)	5	10	50	3	10	30
2	<u>SECTION-B</u> SHORT ANSWER QUESTIONS (SAQ)	10	5	50	6	5	20
Total Questions & Total Marks =		15	-	100	9	-	60

$$\text{Percentage of choice given} = \frac{100 - 60}{100} \times 100 = \frac{40}{100} \times 100 = 40\%$$

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
I B.Sc-HORTICULTURE-I / I Semester End (W.E.F. 2022-23)
BASIC CONCEPTS OF HORTICULTURE AND SOIL SCIENCE
(COURSE: HORT1222)

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

UNIT-I: INTRODUCTION TO HORTICULTURE (12h)

1. Definition of Horticulture, Importance of horticulture in terms of economy, production,
2. Employment generation, environmental protection and human resource development.
3. Scope for horticulture in India.
4. Divisions of horticulture with suitable examples and their importance. Fruit and Vegetable zones of India and Andhra Pradesh.

UNIT-II: CLASSIFICATION AND NUTRITIONAL VALUES OF HORTICULTURE CROPS (12h)

1. Classification of Horticultural crops based on soil and climatic requirements.
2. Nutritive value of horticultural crops.
3. Export and import of horticulture plants

UNIT-III: ENVIRONMENTAL FACTORS - HORTICULTURE CROPS (12h)

1. Influence of soil – physical and chemical properties
2. Climatic factors – light, photoperiod, temperature, relative humidity, rainfall.
3. Micro climate, pollution
4. Influence of biotic and abiotic stresses on crop production.
5. Minerals and Weathering to Form Soils; Factors of Soil Formation.
6. Soil components-Minerals, Organic matter, soil solution, soil air
7. Atmosphere, Weather vs Climate, Weather Elements,

UNIT-IV: SOIL AS A MEDIUM FOR PLANT GROWTH (12h)

Soil reaction, Soil Colloids, soil classification, Problematic soils, Soil temperature and Soil profile
Soil organic matter with the source of nutrients

UNIT-V: MINERAL NUTRITION OF PLANTS (12h)

1. Nutrition- Meaning , Macro and Micro nutrients and their in plant growth ,Deficiency symptoms
2. Biological nitrogen fixation ,Manures and fertilizers
3. Integrated nutrient management
4. Types of Fertilizers, Biofertilizers

HORTICULTURE PRACTICAL SYLLABUS
BASIC CONCEPTS OF HORTICULTURE AND SOIL SCIENCE

Total hours of laboratory Exercises 30 hrs @ 2 per week

Total credits:02

SEMESTER-I PRACTICAL SYLLABUS

1. Study of tools and implements in horticulture.
2. Layout of different planting systems.
3. Layout of nutrition garden.
4. Preparation of nursery beds for sowing of vegetable seeds.
5. Digging of pits for fruit plants.
6. Preparation of fertilizer mixtures and field application.
7. Identification and management of nutritional disorders in vegetables.
8. Collection and preparation of soil samples, estimation of moisture, EC, pH and bulk density.

Suggested Readings:

- ❖ Kumar, N. 1990. Introduction to Horticulture, Rajyalakshmi Publications, Nagarcovil, Tamilnadu.
- ❖ Jitendra Sing, 2002. Basic Horticulture, Kalyani Publishers, Hyderabad.
- ❖ Yerima Bernard P.K. and E. van Ranst, 2005. Introduction to Soil Science, Trafford Publishing.

PRACTICAL MODEL PAPER:

1. Major Experiment	-	15 Marks
2. Minor	-	10 Marks
3. Record and Viva	-	10 Marks

Total	-	35 Marks
CCA	-	15 Marks

TOTAL MARKS	-	50 Marks

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
I Year B.Sc., Degree Examinations at I Semester End
Horticulture Paper I: BASIC CONCEPTS OF HORTICULTURE AND SOIL SCIENCE
(Course: HORT1222 Model Question Paper (W.E.F. 2022-23))

Time: 2½ Hrs.

Max. Marks: 50

PART-1

3×10 =30M

Answer any **Three** of the following questions, draw neat and labeled diagrams wherever necessary

SECTION -A

1. Write an essay on importance and scope of horticulture
2. Influence of biotic and abiotic stresses on crop production
3. Weathering and soil formation

SECTION –B

1. Soil Components
2. Write an essay on nutrition value of Horticultural crops with examples
3. Explain types of Soil Structures.

PART-II

4x5 = 20

Answer any **FOUR** of the following Questions, Draw neat and labeled diagrams wherever necessary

1. Horticulture zones of Andhra Pradesh and India
2. Export and import trade in horticulture
3. Chemical properties of soil
4. Micro climate
5. Soil physical constraints
6. Properties of soil colloids

BLUE PRINT FOR QUESTION SETTER

Unit no. / Title	SAQ	LAQ	Marks allotted to the Module
Unit – 1/ Introduction to Horticulture	1	1	15
Unit – 2/ Classification and Nutritional value of Horticultural crops	1	1	15
Unit – 3/ Environmental factors – Horticultural crops	2	2	30
Unit – 4/ Soil as a medium for plant growth	2	2	30
Unit – 5/ Mineral nutrition of plants	06	06	
Total marks allotted to all questions including choice =			90

Note: Question paper setters are requested to adhere strictly to the above blue print while preparing the said paper

I B.Sc., -Horticulture-1 / I Semester End (W.E.F. 2022-23)
BASIC CONCEPTS OF HORTICULTURE AND SOIL SCIENCE
HORTICULTURE PAPER -1 QUESTION BANK (SEMESTER-1)

UNIT – 1

5 Marks QUESTIONS

1. Divisions of horticulture zones of the country
2. Importance of horticulture in terms of economy, production
3. Write an essay on importance and scope of horticulture

10 Marks QUESTIONS

1. Recent trends in horticulture
2. Write an essay on importance of horticulture in terms of employment generation, environmental protection and human resource development

UNIT – 2

5 Marks QUESTIONS

1. Export and import trade in horticulture crops
2. Classification of crops based on climate

10 Marks Questions

1. Classification of horticultural crops based on soil and climatic requirements
2. Write an essay on nutrition value of Horticultural crops with examples

UNIT – 3

5 Marks Questions

1. Types of soil structure
2. Types of pollution
3. Physical and chemical properties of soil

10 Marks Questions

1. Influence of climatic factors on the growth of plants
2. Influence of biotic and abiotic stresses on crop production

UNIT – 4

5 Marks Questions

1. Classification of soil
2. Properties of soil colloids
3. Factors effecting cation exchange capacity
4. Factors effecting soil pH
5. Soil physical constraints

10 Marks Questions

1. Classification of soil colloids
2. Cation and anion exchange capacity
3. Soil organic matter
4. Explain soil taxonomy
5. Weathering and soil formation

UNIT – 5

5 Marks Questions

1. Integrated nutrient management
2. Explain soil tests and its objectives
3. Soil Micro organisms

10 Marks Questions

1. Soil components
2. Soil organic matter

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
I B.Sc-HORTICULTURE-II / II Semester End (W.E.F. 2022-23)
PLANT PROPAGATION METHODS AND NURSERY MANAGEMENT
(COURSE: HORT2222)

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

UNIT-I: SEXUAL PROPAGATION/SEED PROPAGATION (12h)

1. Sexual propagation and its importance
2. Seed germination, process of seed germination.
3. Factors affecting seed germination

❖ ADDITIONAL INPUT

Pregermination process and viability test

UNIT-II: PROPAGATION THROUGH VEGETATIVE ORGANS (12h)

1. Asexual propagation – Advantages and Disadvantages
2. Using bulbs, corms, tubers and rhizomes to raise nursery

❖ ADDITIONAL INPUT

1. Stolons, runners and offsets in raising nursery

UNIT-III: VEGETATIVE PROPAGATION TECHNIQUES (12h)

1. Plant propagation by layering – Simple, serpentine, mound and air layering.
2. Plant propagation by grafting – approached and detached (whip, cleft, side veneer and bark)
3. Plant propagation by budding – T-, patches and chip budding techniques
4. ,Propagation by cuttings: Root, leaf and stem cuttings

❖ ADDITIONAL INPUT

1. Micro propagation

UNIT-IV: BASIC REQUIREMENTS OF A NURSERY

(12h)

1. Definition of nursery; Nursery- site selection, lay out, records
2. Different types of nursery beds – flat beds, raised beds and sunken beds, their merits and demerits.
3. Nursery structures - Potting, repotting; Different nursery techniques and their management.
4. Containers for plant nursery.

❖ ADDITIONAL INPUT

1. Problems in nursery management and its control

UNIT -V: NURSERY MANAGEMENT

1. Nursery accreditation and certification
2. Seasonal activities and routine operations in a nursery; Watering, Weeding and control of pests and diseases.
3. Nursery development

HORTICULTURE PRACTICAL SYLLABUS

PLANT PROPAGATION METHODS AND NURSERY MANAGEMENT

Total hours of laboratory Exercises 30 hrs @ 2 per week

Total credits:02

SEMESTER-II PRACTICAL SYLLABUS

1. Media for propagation of plants in nursery beds, pot and mist chamber.
2. Preparation of nursery beds and sowing of seeds. Raising of rootstock.
3. Seed treatments for breaking dormancy.
4. Preparation of plant material for potting. Hardening plants in the nursery.
5. Practicing different types of cuttings, layering, grafting and buddings.
6. Preparation of plant growth regulators for seed germination and vegetative propagation.

Suggested Readings:

- ❖ Sadhu, M.K. 1996. Plant Propagation. New Age International Publishers, New Delhi.
- ❖ Sarma, R.R. 2002. Propagation of Horticultural Crops: Principles and Practices, Kalyani Publishers, New Delhi.
- ❖ Hartman, HT and Kester, D.E. 1976. Plant Propagation. Principles and Practices, Prentice Hall of India Pvt. Ltd. Bombay.

Horticulture Paper II: PLANT PROPAGATION METHODS AND NURSERY
MANAGEMENT

(Course: HORT2222 Model Question Paper W.E.F. 2022-23)

Time: 2½ Hrs.

Max. Marks: 50

PART - I

Answer any **Three** of the following questions. Draw neat and labeled diagrams wherever necessary.

Section – A

3x10=30

1. Explain the process of seed germination and factors affecting seed germination
2. Write an essay on Asexual propagation and using corms, rhizomes to raise nursery
3. Write an essay on plant propagation by grafting.

Section - B

4. Explain the different kind of Nursery beds their merits and demerits in detail
5. Write an essay on seasonal activities and routine operations in a Nursery
(i) Watering (ii) Weeding (iii) Control of pests (iv) Control of diseases
6. Explain the details about different nursery structures techniques and their management

PART - II

4x5 = 20

Answer any **Four** of the following questions. Draw diagrams wherever necessary

6. Write note on seed germination
7. Discuss using tubers to raise nursery
8. Propagation by air layering
9. Containers for plant nursery
10. Nursery development
11. Chip budding technique
12. Routine operations in a Nursery
(i) Control of pests (ii) control of diseases.
13. Explain short note on types of propagations

BLUE PRINT FOR QUESTION SETTER

Unit no. / Title	SAQ	LAQ	Marks allotted to the Module
Unit – 1/ SEXUAL PROPAGATION/SEED PROPAGATION	2	1	20
Unit – 2/ PROPAGATION THROUGH VEGETATIVE ORGANS	1	1	15
Unit – 3/ VEGETATIVE PROPAGATION TECHNIQUES	2	1	20
Unit – 4/ BASIC REQUIREMENTS OF A NURSERY	1	2	25
Unit – 5/ NURSERY MANAGEMENT	2	1	20
Total marks allotted to all questions including choice =			100

Note: Question paper setters are requested to adhere strictly to the above blue print while preparing the said paper

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
I B.Sc., -Horticulture-II / II Semester End (W.E.F. 2022-23)
PLANT PROPAGATION METHODS AND NURSERY MANAGEMENT
HORTICULTURE PAPER -II QUESTION BANK (SEMESTER-II)

UNIT – 1

5 Marks Questions

1. Write a note on Seed germination
2. Explain short note on types of propagations

10 Marks Questions

1. Explain the process of seed germination and factors affecting seed germination
2. Explain the sexual propagation and its importance

UNIT – 2

5 Marks Questions

1. Write a note on Bulbs and their use in raising Nursery
2. Discuss using tubers to raise nursery

10 Marks Questions

1. Write an essay on Asexual propagation and using corms ,Rhizome to raise nursery
2. Define Asexual propagation in plants and discuss their advantages and disadvantages

UNIT – 3

5 Marks Questions

1. Chip budding technique
2. Air layering

10 Marks Questions

1. Write an essay on plant propagation by Grafting
2. Write an essay on plant propagation by layering

UNIT – 4

5 Marks Questions

1. Potting and Repotting
2. Containers of plant nursery

10 Marks Questions

1. Explain the different kinds of Nursery beds their merits and demerits in detail
2. Explain the details about different Nursery structures technique and their management

UNIT – 5

5 Marks Questions

1. Nursery development
2. Routine operations in a Nursery
 - (1) Control of pests.
 - (2) Control of diseases

10 Marks Questions

1. Write an essay on seasonal activities and routine operations in a Nursery
 - (i) Watering
 - (ii) Control of pests
 - (iii) Weeding
 - (iv) Control of diseases.
2. Write an essay on Nursery accreditation and certification.

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
II B.Sc-HORTICULTURE-III / III Semester End (W.E.F. 2022-23)
OLERICULTURE (COURSE: HORT3222)

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

UNIT-I: SOLANACEOUS VEGETABLES (12h)

Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of following crops:

- a. Cultivation of Brinjal,
- b. Cultivation of tomato
- c. Cultivation of Chilli
- d. Cultivation of okra

UNIT-II: LEAFY VEGETABLES (12h)

Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of following crops:

- a. Cultivation of Amaranth and Spinach
- b. Cultivation of Coriander and Mentha

UNIT-III: ROOT AND BULB CROPS (12h)

Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of following crops:

- a. Cultivation of Colocasia and Dioscorea
- b. Cultivation of Sweet Potato and Tapioca
- c. Cultivation of Carrot and Beet root
- d. Cultivation of Onion

UNIT-IV: COLE CROPS (12h)

Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of following crops:

- a. Cultivation of Cabbage
- b. Cultivation of Cauliflower
- c. Cucurbitaceae- bottle guard, Ridge guard

UNIT-V: LEGUMINOUS VEGETABLES (12h)

Importance, morphology and taxonomy, varieties, climate and soil, seeds and sowing, manuring, irrigation, intercultural operations, diseases and their control, harvesting and yield of following crops:

- a. Cultivation of Cluster bean and double bean
- b. Cultivation of Cow pea and Dolichos
- c. Ivy gourd

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
II B.Sc-HORTICULTURE-III / III Semester End (W.E.F. 2022-23)
HORTICULTURE PRACTICAL SYLLABUS
OLERICULTURE

Total hours of laboratory Exercises 30 hrs @ 2 per week

Total credits:02

SEMESTER-III PRACTICAL SYLLABUS

1. Identification of vegetable seeds and vegetable crops at different growth stages
2. Sowing/ transplanting of vegetables in main field
3. Determining the germination percentage of vegetable seed
4. Preparing vegetable nursery beds
5. Raising vegetable seedlings in nursery bed and portrays
6. Land preparation for sowing/ transplanting of vegetable crops
7. Fertilizer application for vegetable growing
8. Identification of major diseases and insect pests of vegetables
9. Visit to vegetable field to study methods of vegetable cultivation
10. Special Cultural crops horticulture in vegetable crops
11. Irrigation requirements for different vegetable crops
12. Harvesting indices for indices
13. Indices for different vegetable crops
14. Physical disorders, factors and parameters for important crops

Suggested Readings:

- Bose T K et al. (2003) Vegetable crops, Naya Udhog Publishers, Kolkata.
- Singh D K (2007) Modern vegetable varieties and production, IBN Publisher Technologies, International Book Distributing Co, Lucknow.
- Premnath, Sundari Velayudhan and D P Sing (1987) Vegetables for the tropical region, ICAR, New Delhi

PRACTICAL MODEL PAPER:

1. Major Experiment	-	15 Marks
2. Minor	-	10 Marks
3. Record and Viva	-	10 Marks

Total	-	35 Marks
CCA	-	15 Marks

TOTAL MARKS	-	50 Marks

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
II Year B.Sc., Degree Examinations at III Semester End
Horticulture Paper III: OLERICULTURE
(Course: HORT3222 Model Question Paper (W.E.F. 2022-23))

Time: 2 1/2 Hrs.

Max. Marks: 60

SECTION – A

3X10 = 30M

Answer any Three of the following questions

1. Production technology of brinjal
2. Production technology of amaranthus
3. Cultivation practices of beet root
4. Production technology of cauliflower
5. Cultivation practices of cluster bean

SECTION –B

6X5 = 30M

Answer any Six of the following questions. Draw diagrams wherever necessary

1. Resistant varieties in Tomato leaf curl disease
2. Physiological disorders of Tomato
3. Sex expression in spinach
4. Different groups of leafy vegetables
5. Physiological disorders of carrot
6. Cultivation practices of sweet potato
7. Seed production in cabbage
8. Explain climate and soil conditions of dolichos and double bean
9. Physiological disorders of cauliflower
10. Important varieties of cowpea and cluster bean

HORTICULTURE PAPER -III QUESTION BANK (SEMESTER-III)

UNIT – 1

5 Marks Questions

1. Seed production in Tomato
2. Resistant varieties in Tomato leaf curl disease
3. Physiological disorders of Tomato
4. Physiological disorders of chilly

10 Marks Questions

1. Production technology of tomato
2. Production technology of brinjal
3. Production technology of capsicum

UNIT – 2

5 Marks Questions

1. Importance or utility of Amaranthus
2. Sex expression in spinach
3. Different groups of leafy vegetables

10 Marks Questions

1. Production technology of Amaranthus
2. Production technology of spinach
3. Production technology of coriander

UNIT – 3

5 Marks Questions

1. Physiological disorders of carrot
2. Physiological disorders of beetroot
3. Propagation techniques in sweet potato
4. Explain classification of carrot with examples

10 Marks Questions

1. Production technology of colocasia
2. Production technology of sweet potato
3. Production technology of carrot
4. Production technology of beetroot

UNIT – 4

5 Marks Questions

1. Physiological disorders of cauliflower

2. Seed production in cabbage

10 Marks Questions

1. Production technology of cabbage
2. Production technology of cauliflower

UNIT – 5

5 Marks Questions

1. Explain climate and soil conditions of dolichos and double bean
2. Important varieties of cowpea and cluster bean

10 Marks Questions

1. Production technology of cluster bean
2. Production technology of cowpea

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
II B.Sc-HORTICULTURE-IV / IV Semester End (W.E.F. 2022-23)
BASICS OF FRUIT SCIENCE (POMOLOGY)
(COURSE: HORT4222)

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:

Unit 1 : Introduction to Fruit crops **12 Hrs.**

1. Importance of fruit growing in India and Andhra Pradesh.
2. Nutritive value of fruits.
3. Area and production of India and Andhra Pradesh.
4. Export and import of fruits in India.

❖ ADDITIONAL INPUT

Constraints in fruit production and remedies to overcome them.

Unit 2 : Tropical Fruit Crops **12 Hrs.**

Origin, history, distribution, area and production, uses and composition, varieties, soil and climatic requirements, propagation, planting, training and pruning, manuring and fertilizer application, irrigation, intercropping, harvesting and yield, diseases and pests of the following tropical fruit crops:

- (a) Mango (b) Guava and (c) Papaya

Unit 3 : Sub-tropical and temperate fruit crops **12 Hrs.**

Origin, history, distribution, area and production, uses and composition, varieties, soil and climatic requirements, propagation, planting, training and pruning, manuring and fertilizer application, irrigation, intercropping, harvesting and yield, diseases and pests of the following sub-tropical and temperate fruit crops:

- (a) Grapes (b) Pomegranate (c) Citrus and (d) Apple

Unit 4 : Arid and minor fruit crops **12 Hrs.**

Origin, history, distribution, area and production, uses and composition, varieties, soil and climatic requirements, propagation, planting, training and pruning, manuring and fertilizer application, irrigation, inter cropping, harvesting and yield, diseases and pests of the following arid fruit crops:

- (a) Amla (b) Dates and (c) Wood apple

❖ **ADDITIONAL INPUT**

1. Bael
2. Ber

Unit 5 : Management practices for fruit crops

12 Hrs.

1. Principles of IPM.
2. Harvesting
3. Grading, packing, storage and marketing of fruits.

❖ **ADDITIONAL INPUT**

1. Sustainable Production Practices for Local Fruit Production
2. Integrated Orchard Management

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA

HORTICULTURE PRACTICAL SYLLABUS
Basics of Fruit Science (Pomology)

Total hours of laboratory Exercises 30 hrs @ 2 per week

Total credits:02

SEMESTER-IV PRACTICAL SYLLABUS

1. Study of varieties of Mango, Papaya and Guava.
2. Study of varieties of Grape, Pomegranate, Citrus and Apple.
3. Study of varieties of Amla, Dates and Wood apple.
4. Manure and fertilizer application including biofertilizers in different fruit crops
5. Methods of application, calculation of the required quantity of manure and fertilizers based on the nutrient content.
6. Use of growth regulators in fruit crops.
7. Identification and collection of important pests in fruit crops.
8. Identification and collection of important diseases in fruit crops and Herbarium preparation.

9. Visit to a fruit market/commercial orchids

Text books :

- **Chattopadhyay, T.K.1997.** Text book on Pomology (Fundamentals of fruit growing), Kalyani Publishers, Hyderabad.

- **Chundawat, B.S. 1990.** Arid Fruit Culture, Oxford and IBH, New Delhi.

- **Gourley J H 2009.** Text book of Pomology, Read Books Publ.

Horticulture Paper IV: Basics of Fruit Science (Pomology)
(Course: HORT4222 Model Question Paper (W.E.F. 2022-23))

Time: 21/2 Hrs.

Max. Marks: 60

SECTION – A

3X10 = 30M

Answer any Three of the following questions. Draw neat and labeled diagrams wherever necessary.

1. Area and production of fruit crops in Andhra Pradesh and India.
2. Production technology of Mango.
3. Production technology of Amla.
4. Production technology of Dates.
5. Principles of IPM.

SECTION –B

6X5 = 30M

Answer any Six of the following questions. Draw diagrams wherever necessary

1. Importance of fruit crops.
2. Varieties of Mango.
3. Training and pruning in grapes.
4. Sex determination and pollination in Papaya.
5. Harvesting indices in pomegranate and apple.
6. Importance of Amla.
7. Post-harvest practices of fruit crops.
8. Marketing of fruit crops.

5 MARKS

1. Post-harvest practices of fruits.
2. Marketing of fruits.

10 MARKS

Integrated pest management in fruit crops

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA
II B.Sc-HORTICULTURE-V /IV Semester End (W.E.F. 2022-23)
PESTS AND DISEASES OF HORTICULTURE PLANTS AND THEIR
MANAGEMENT
(COURSE: HORT5222)

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

Unit 1 :Basics of Entomology and Plant Pathology

1. Classification of Insects upto orders and families of economic importance; Study of insect pests in horticultural crops.
2. Plant Pathology : Definition
3. A general account on symptoms of plant diseases caused by Viruses
4. A general account on symptoms of plant diseases caused by Fungi.

❖ ADDITIONAL INPUT

1. A general account on symptoms of plant diseases caused by Bactria.

Unit 2 :Pests and diseases of Solanaceae, Cucurbitaceae Families.

1. Cucurbits: Fruit flies, Pumpkin beetles; Downy and powdery mildews.
2. Potato: Potato tuber moth, Late blight
3. Sweet Potato: Sweet potato weevil, Vine borer.
4. Bhendi: Spotted boll worms, Red cotton bug, Yellow vein mosaic.

Unit 3 :Pests and diseases of Fruit crops

1. Coconut :Rhinoceros beetle, Burrowing nematode; Grey blight
2. Banana :Banana weevil, banana aphids; Panama wilt.
3. Cashew : Cashew stem borer; Anthracnose.
4. Custard apple : Mealy bug, Fruit boring caterpillar.

❖ ADDITIONAL INPUT

Coconut : Ganoderma root rot

Cashew : Pink disease

Unit 4 :Pests and diseases of Commercial Flower crops

1. Rose :Rose aphid,Dieback, and black spot
2. Marigold :Aphids, leaf spot, and bud rot
3. Gerbera :Thrips, white flies and Blossom blight
4. Gladiolus :Cut worms, leaf eating caterpillar and corm rot.

Unit 5 :Management of Pests and Diseases

1. Principles and methods of plant disease management.
2. Integrated Plant disease management.
3. Insect pests in horticulture crops and their management.

❖ ADDITIONAL INPUT

1. Fungicides classification based on chemical nature; commonly used insecticides, fungicides, bactericides and nematicides.
2. Preparation of fungicidal solutions, slurries, pastes and their application.

PITHAPUR RAJAH'S GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA

Horticulture Paper IV : PESTS AND DISEASES OF HORTICULTURE PLANTS
AND THEIR MANAGEMNT

(Course: HORT5222 Model Question Paper (W.E.F. 2022-23))

Time: 21/2 Hrs.

Max. Marks: 60

SECTION – A

3X10 = 30M

Answer any Three of the following questions. Draw neat and labeled diagrams wherever necessary.

1. A General account on symptoms of plant diseases caused by Fungi.
2. Discuss briefly on Pest and diseases and their management of Cucurbits
3. Pest and diseases of Coconut
4. Discuss briefly on Pest and diseases and their management of Marigold
5. Integrated plant disease management
- 6.. Pest and diseases of Gerbera

SECTION – B

6X5 = 30M

Answer any Six of the following questions. Draw diagrams wherever necessary

9. Classification of Insects
10. Powdey mildew disease in Cucurbits
11. Anthracnose disease in Cashew
12. Pest and diseases of Banana
13. Sweet potato weevil disease in Sweet potato
14. Die back disease in Rose
15. Insect pests in horticulture crops.
16. Principles and methods of plant disease management

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

UNIT – 1: Diseases of Vegetable Crops-Basic technology concept of plant diseases and its management Symptoms of viral diseases. (10 Hrs.)

1. Brinjal: Wilt, Phomopsis blight, Sclerotinia foot rot, Little leaf of Brinjal
2. Tomato: Late blight, early blight, leaf curl
3. Chilly: Anthracnose, leaf curl

UNIT – 2: DISEASES OF COMMERCIAL FLOWER CROPS (16Hrs.)

1. Rose: dieback, black spot
2. Chrysanthemum: Septoria leaf spot, Basal stem rots
3. Jasmine: Leaf blight, Rust
4. Gerbera: Blossom blight, powdery mildew

UNIT – 3: DISEASES OF FRUIT CROPS (12 Hrs.)

1. Mango: Malformation, Anthracnose, Black tip
2. Papaya: Papaya mosaic, Papaya ring spot, Papaya leaf curl
3. Citrus: Canker, root rot

UNIT – 4: INTEGRATED PEST AND DISEASE MANAGEMENT (12 Hrs.)

1. Pesticide classification on use, chemical nature, formulation, toxicity and action.
2. Pesticide Dissipation, Residue Dynamics, Different methods/ Steps in residue analysis.
3. Maximum Residue Levels in pesticide
4. Pesticide Management.

UNIT – 5: PESTICIDES (10 Hrs.)

1. Integrated Pest and Disease Management practices in Fruits, Vegetables, Flower crops, Medicinal and Plantation crops.
2. Insect pests in horticulture crops and their management.

SEMESTER-V PRACTICAL SYLLABUS

1. Field visit and acquaintance with diseases of crops
2. Study of pathogens where possible; important diseases are:
 - a. Late blight of Potato
 - b. Wilt of Tomato
 - c. Anthracnose of beans
 - d. Powdery mildew of pea
 - e. Rhizome rot of Ginger
 - f. Stem gall of coriander
 - g. Powdery mildew
 - h. Downy mildew of cucurbits
 - i. Rust of onion and garlic
 - j. Dieback of Rose
3. Acquaintance with common fungicides and their methods of application.

Total Credits:03

UNIT – 1: PROTECTED CULTIVATION (16 Hrs.)

1. Importance and scope of protected cultivation of vegetable crops.
2. Principles used in protected cultivation, energy management, low cost structures; training methods; engineering aspects.
3. Regulatory structures used in protected structures; types of greenhouse/ polyhouse/ shade nets, hot beds, cold frames,
4. Effect of environmental factors, viz. temperature, light, CO₂ and humidity on growth of different vegetables, manipulation of CO₂, light and temperature for vegetable production, fertigation.

UNIT – 2: AGRICULTURE FINANCE AND MANAGEMENT (14 Hrs.)

1. Credit, Meaning, Importance and credit control. Definition, need for finance in agriculture, characteristics of good agricultural finance (credit)
2. Decision on the use of credit, Principles of farm credit (Equity or Increasing Risk), Added Cost and Added Return, Cost of Credit and no loss no profit goal of farming and opportunity cost Principle.
3. Supporting agencies (Commercial banks, RRB, Lead Bank, NABARD, Cooperative Credit (PACs, Land Development Banks, National Cooperative Federation, Farmers Service Cooperatives).

UNIT – 3: NURSERY PRODUCTION (08 Hrs.)

1. Nursery raising in protected structures like poly-tunnels,
2. Types of benches and containers
3. Different media for growing nursery under cover.

UNIT – 4: CULTIVATION OF HORTICULTURE CROPS IN PROTECTED WAYS (12 Hrs.)

1. Regulation of flowering and fruiting in vegetable crops, technology for raising tomato, sweet pepper, cucumber and other vegetables in protected structures.
2. Training and staking in protected crops, varieties and hybrids for growing vegetables in protected structures.
3. Insect and disease management in protected structures; soil-less culture, use of protected structures for seed production.

UNIT – 5: CROP PROTECTION (10 Hrs.)

1. Recognition and Causes of Crop Disorders; Recognition, Biology and Control of Weeds, govt agencies Recognition, Biology and Control of Pests; Recognition, Biology and Control of Diseases.
2. Composition, Activity and Persistence of Crop Protection Chemicals and Biological agents.
3. Application of Crop Protection Chemicals; Safe Use, Handling, Transport and Storage of Crop, Protection Chemicals.

HORTICULTURE PRACTICAL SYLLABUS
PROTECTED CULTIVATION OF HORTICULTURAL CROPS

Total hours of laboratory Exercises 30 hrs @ 2 per week

Total credits:02

SEMESTER-VI PRACTICAL SYLLABUS

1. Study of various types of structures.
2. Breeding
3. Methods to control temperature, CO₂, light, media, training and pruning
4. Seed production technology
5. Control of insect-pests and diseases in greenhouse
6. Economics of protected structures.
7. Visit to established green/polyhouse/net house/shade house in the region.

SUGGESTED READINGS:

- Chandra S & SomV. 2000. Cultivating Vegetables in Green House. Indian Horticulture 60:17-18.
- Prasad S & Kumar U. 2005.Greenhouse Management for Horticultural Crops. Agrobios.

Horticulture Paper VII: PROTECTED CULTIVATION OF HORTICULTURAL
CROPS

(Model Question Paper (W.E.F. 2022-23))

Time: 21/2 Hrs.

Max. Marks: 60

SECTION – A

3X10 = 30M

Answer any THREE of the following questions. Draw neat and labeled diagrams wherever necessary.

1. Manipulation of environmental factors in protected cultivation.
2. Types of loans and classification of agriculture credit.
3. Nursery raising in Protected structures in poly tunnels.
4. Insect and disease management in protected cultivation.
5. Recognition and causes of crop disorders.

SECTION – B

6X5 = 30M

Answer any SIX of the following questions. Draw diagrams wherever necessary

1. Importance of cultivation of vegetables in protected structures.
2. Fertigation.
3. Definition and importance of farm credit.
4. Principles of farm credit.
5. Types of benches.
6. Types of containers.
7. Training and staking in vegetable crops.
8. Soil less culture.
9. Transport and storage of crops.
10. Handling of plant protection chemicals.

PROTECTED CULTIVATION OF HORTICULTURAL CROPS
HORTICULTURE PAPER -VII QUESTION BANK (SEMESTER-VI)

UNIT – 1

5 Marks QUESTIONS

1. Importance of protected cultivation of vegetable crops.
2. Environmental factors on protected cultivation.
3. Fertigation

10 Marks QUESTIONS

1. Regulatory structures used in protected cultivation.
2. Manipulation of environmental factors in protected cultivation

UNIT – 2

5 Marks QUESTIONS

1. Definition and importance of Agriculture finance.
2. Principles of Farm credit.
3. Types of loans.

10 Marks Questions

1. Sources of Agriculture Finance.
2. Types of loans and classification of agriculture credit.

UNIT – 3

5 Marks Questions

1. Types of Benches.
2. Types of Containers.

10 Marks Questions

1. Nursery raising in protected structures in poly tunnels.
2. Different media for growing nursery under cover.

UNIT – 4

5 Marks Questions

1. Training and staking in vegetable crops.
2. Soilless culture.
3. Use of Protected structures for seed production.

10 Marks questions

1. Regulation of flowering and fruiting in vegetable crops.
2. Insect and disease management in protected structures.

UNIT-5

5 Mark's questions

1. Transport and storage of crops.
2. Protection chemicals.
3. Handling of protection chemicals.

10 Mark's Questions

1. Recognition and causes of crop disorders.
2. Activity and persistence of crop protection chemicals and Biological agents.

III B.Sc-HORTICULTURE-VIII-A-1 (CLUSTER)/ VI Semester End (W.E.F. 2022-23)
HORTICULTURE EXTENSION AND VALUE ADDED PRODUCTS**

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

UNIT – 1: BASICS OF HORTICULTURE EXTENSION (14 Hrs.)

1. Extension education: meaning, definition, nature, scope, objectives, principles, approaches and history.
2. Motivation of women community, children, youth and voluntary organizations for horticulture extension work.
3. Transfer of technology programs like lab to land programme (LLP) national demonstration (ND), front line demonstration (FLD) Krishi Vigyan Kendras (KVK).
4. Scope and importance of Participatory Rural Appraisal (PRA) & Rapid Rural Appraisal (RRA).

UNIT – 2: COMMUNICATION AND PROGRAMME PLANNING (12 Hrs.)

1. Communication – meaning, definition, models, elements and their characteristics.
2. Types and barriers in communication.
3. Programme planning – meaning, definition, principles, steps in programme development process and monitoring.
4. Evaluation of extension programs.

UNIT – 3: MODERN COMMUNICATION GADGET (10 Hrs.)

1. Modern communication sources – internet, video and teleconferencing.
2. Interactive Multimedia Compact Disk (IMCD) village kiosks,
3. Kissan Call Centre (KCC), mobile phone.

UNIT – 4: PROCESSING AND VALUE ADDITION (12 Hrs.)

1. Processing using sugar: principle – processing of jam, jelly, marmalade, squash, RTS, nectar, fruit bar, preserves and candies.
2. Processing using salt: Principle – brining preservation of horticultural produces preparation of pickles and sauces.
3. Processing of dehydrated products, fruit pulps, vegetable and spice products, Canning: principles, methods – preparation of canned products - spoilage of canned foods and its prevention.

UNIT – 5: PRINCIPLES OF PRESERVATION (12 Hrs.)

1. Preservation by low temperature: definition, principle, method, suitability, refrigeration,
2. Freezing - preparation of frozen foods, preservation by controlled atmosphere, modified atmosphere: definition, principle, method, suitability.
3. Processing by irradiation: definition, principle, method, suitability – application of irradiation in food industry.

MEDICINAL AND PLANTATION CROPS**

Total hours of Teaching 60hrs @ 4 hrs per week

Total Credits:03

UNIT-I: PRODUCTION TECHNOLOGY OF FOLLOWING CROPS (15Hrs)

COCONUT: Uses, Varieties- Tall x dwarf hybrids (TxD), Dwarf x tall hybrids (DxT), Tall x tall hybrids (T x T). Soil, Climate, Propagation – Seed propagation, Selection of seed nuts, selection of seedling for planting. Preparation of pits and planting, Irrigation, Manuring and fertilization, methods of application of fertilizers, weeding. Harvesting, Yield, Storage.

OIL PALM: Introduction, uses, varieties, seed propagation, Climate – Sunshine and Temperature Requirement Types of soils for oil palm growing regions, Spacing, Planting, Irrigation, Manuring, Weeding and Mulching Harvesting and yield

COCOA: Introduction, products/Byproducts chocolate, varieties, Climate, Soil, Seed and Vegetative propagation, Cuttings, preparation of land, provision of Shade, Spacing, Planting- Cocoa under Natural Shade, Intercropping Irrigation, Manuring, weeding, types of branching, training and pruning, Harvesting.

UNIT-II: (15Hrs)

CASHEW NUT: Introduction, uses, Climate, Soils, varieties/ hybrids, Propagation – Vegetative propagation, Epi-cotyl grafting and Cuttings. Planting, Branching Pattern, Irrigation, weeding, Manuring, Training and pruning, Rejuvenation, flowering, Harvesting, Yield.

COFFEE: Introduction, soil, Climate, types- differences Arabica/robusta, branching, varieties, propagation, Raising nurseries. Preparation of main field and planting, Provision of shade, Advantages of shade, Disadvantages of shade, Irrigation, Manuring, Training and pruning – Trenching, Mulching, Weeding, Liming, Flowering- season of flowering, Fruit set and harvesting and Yield.

UNIT-III: MEDICINAL PLANTS (15Hrs)

ALOE: Importance and uses, description of plant, species and varieties, soil, climate, land preparation, propagation crop duration, spacing & planting, manuring, irrigation, inter-cultivation, harvesting, yield and chemical composition.

RAUVOLFIA, MORINDA: Importance and uses, botany, varieties, soil, climate propagation spacing, planting, manuring, irrigation, weeding, harvesting, root yield.

ASWAGANDHA: Importance and uses, description of plant, varieties, soil, climate, propagation manures, fertilizers and inter cultivation Harvesting, crop duration, method of harvesting drying, grading and yield, chemical constituents.

UNIT-IV: AROMATIC CROPS: (15Hrs)

CITRONELLA & LEMONGRASS: Importance and uses, botany, varieties, soil, climate, land preparation, propagation, spacing, planting, manures and fertilizers, irrigation, interculture, harvesting & yield of herb and oil.

MINT: Importance and uses, distribution, description of species of mint, varieties, chemical composition and uses, seasons, soil, climate, land preparation, propagation, spacing, planting, manures and fertilizers, irrigation, interculture, harvesting & yield.

P R GOVERNMENT COLLEGE (AUTONOMOUS), KAKINADA

The Board of Studies in B.Sc Horticulture for the Academic year 2022-23 held in Dec 2022 in Dept. of Botany & Horticulture, PRGC(A), Kakinada.

AGENDA:

The Board of Studies of a Department in the college shall:

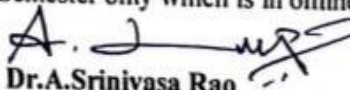

1. Adopting affiliated University syllabus for I to IV Semesters
2. Adopting 60- External evaluation and 40- Internal evaluation for all Semesters for the Academic year 2021-22.
3. Conduct of Semester End Practical examinations for Ist & IInd Year
4. Approval of MCQ for I Year Students
5. Approval of conversion of teaching method for some practical oriented topics through audio & video visuals
6. Approval of student online courses including faculty for the year 2022-23

The members of B.O.S in Botany discussed all the issues kept in agenda at length and taken following resolutions.

RESOLUTIONS:

1. The Chairperson submitted the syllabus for Horticulture which was adopted from the Adikavi Nannaya University from the Academic year 2021-22.
2. Resolved to adopt 60 External, 40 Internal evaluations for all 3 Years students.
3. Resolved to conduct practical for all semesters
4. Resolved to change Practical into 50 Marks Project
5. Resolved to conduct MCQ pattern Mid examination for I Semester only which is in online mode.
