

## **Observation of Zero Shadow Day**

Event date: 7.5.2023

The Zero Shadow Day- 2023 was observed by the Department of Physics and Electronics, on 7.5.2023 in the open area near the physics block. The faculty of science departments and students participated in the event of the remarkable day. The HoD, Sri U.V.B.B.Krishna Prasad explained, why the Day is called so and the reason for the happening. In every year it falls twice at different places at different times around the globe. This practical session gave a valuable information to the students regarding the Solar System and Solar Constant which appears in the curriculum of their Paper-III, "Thermodynamics & Radiation Physics".
