Objectives and outcome of the course Petrochemicals

To give basic knowledge and awareness on petroleum and petrochemical products to the undergraduate level students, so that maintains linkages with Industries and research laboratories to expose the students to higher levels of knowledge and application of chemistry and then to provide job opportunities to the students in different industries.

With this impression the department of chemistry, P R Govt. College (A), introduced Mathematics, Chemistry and petrochemicals (MCPC) group in 1998-99. The objective of this course

The objective of B.Sc. Petrochemicals course is to teach students the basics about petroleum, petrochemicals and their processes. This subject gives student detailed information about petroleum and its formation.

In this three-year course spread over six semesters, there are 10 papers of Petrochemicals 7 papers of chemistry and 7 papers of Mathematics.

After graduating in Petrochemicals the students can pursue academics in Chemistry, Petroleum engineering, Petrochemicals and other disciplines of inter- disciplinary sciences. They can also use it as a stepping stone to different chemical, petrochemical and fertilizer in industries
